

oneWeigh™ | Transfer Plus Module

Are intercompany transfers causing a headache?
Do you create both sides of the transfer ticket at one location and then do a weigh only ticket at the other?

✓ An enhancement for oneWeigh™ scale automation and integrates with AGRIS™

✓ Installing Transfer Plus is easy

✓ Add transfer load numbers to oneWeigh™ and you are set to go

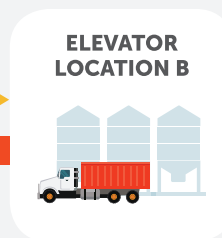

✓ Communication errors between the truck driver and the elevator are reduced

Transferring grain between locations involves several steps and requires accurate record keeping. Transfer Plus for oneWeigh scale automation helps you to automate the accounting process, speed up operations, and reduces the risk of manual processes.

Outbound location
where the truck is getting filled with commodity x

Ticket information gets transferred to the inbound location's oneWeigh

In-bound location
where the truck is getting dumped with commodity x

Ticket information is updated in AGRIS™ and the outbound ticket

Key Features

- ✓ As a scale operator, you no longer need to go through the lengthy multi-step process on the grain ticket screen to complete a transfer
- ✓ The manual process of copying weights and grades from the inbound to the outbound ticket is now done for you automatically
- ✓ You can now assign a unique ticket number to all loads that are moving across the countryside for traceability
- ✓ You can scale on both the inbound and outbound quickly, allowing the company to have a checks and balances

Benefits

- ✓ Saving time and reducing errors for you, and customer is happy because they can get off the scale faster and keep moving
- ✓ Lower variable expense, better efficiency within the accounting department
- ✓ Traceability reduces the chance of theft
- ✓ Internal auditing becomes much easier
